GitHub: JHWebDeveloper available by request

I am currently a news editor at WFTV Channel 9, I have 10 years experience as a freelance full-stack developer and have created 3 different applications that Channel 9 employees use daily. I've recently been looking to switch careers as I've come to realize that web development is not only a profession I am very skilled at but an art I truly enjoy. I would like to apply my talents at a larger scale. My portfolio with Github links is available at www.jonathanhamilton.com/portfolio

— EXPERIENCE

Web Developer · Freelance · October 2009 - Present

- Planned, developed, deployed and maintained several projects including but not limited to React/Electron apps, React/Node.js and Vanilla JS responsive websites
- Effectively translated clients' visions into production
- Applied SEO techniques to websites with effective results
- Kept projects up to date with the latest security fixes and design trends
- Strong focus on user experience, device responsiveness and cross-browser compatibility

News Editor · WFTV Channel 9 Eyewitness News · May 2010 - Present

- Voluntarily developed and maintained multiple applications to aid co-workers
- Awarded Employee of the Quarter for my developer contributions, October 2019
- Promoted to Dayside Editor for contributions to WFTV's PULSE coverage, June 2016
- Rapidly edited video segments under pressing deadlines daily
- Transcoded, ingested and exported video and maintained vast digital and tape archives
- Regularly identified automatable tasks and wrote scripts/applications to perform them
